SUMMARY

Front-end developer and graphic designer with experience in web content management, responsive web development, email design, and digital marketing. A quick learner who taught herself HTML/CSS in under a week at Firmenich, sparking a lasting interest in development and design. Combines creative problem-solving with technical skills to build engaging digital experiences.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frameworks & Tools: React, React Native, Vite, Expo, Git, GitHub, Netlify, REST APIs
Design: Figma, Adobe Photoshop, Illustrator, InDesign
Concepts: Responsive Design, UI/UX Principles, Mobile-First Development
AI Tools: Experienced using AI as a coding partner and learning accelerator (GitHub Copilot, Claude, ChatGPT)

EDUCATION

FreeCodeCamp — Front-End Development Certification
Responsive Web Design, JavaScript Algorithms, Front-End Development, UI/UX Design, API Integration

Rutgers University – Camden, NJ — Bachelor of Arts and Sciences, Graphic Design

PROJECTS

RootdCore – Chronic Illness Community Platform | *React, TypeScript, Vite*

- Built a mobile-first community platform with user profiles, posts, comments, and wellness check-ins — architecture informed by visual community-building principles similar to Pinterest's discovery and engagement model.
- Implemented mock APIs for user data and community interactions; deployed on Netlify.

RootdCore Email Campaign | *HTML, CSS, Sanity*

- Designed and developed a branded HTML email campaign with structured content sections, styled buttons, and responsive layout considerations.
- Refined spacing, alignment, and visual hierarchy to create a polished email experience.

Weather Dashboard | *JavaScript, OpenWeather API*

- Built a weather search app displaying current conditions and a 5-day forecast with API integration, DOM updates, and error handling.

EXPERIENCE

Firmenich Inc. — IS Graphic Design Consultant (2019–2021)

- Self-taught HTML/CSS in under one week to build and debug internal webpages — a rapid learning experience that sparked a lasting passion for engineering and design.
- Translated complex technical training content into accessible visual formats, bridging the gap between design and engineering teams.

The Mattress Factory — Marketing Graphic Designer (2022–2024)

- Designed digital and print campaigns; improved asset workflows, reducing turnaround time by 25%.
- Leveraged Pinterest boards as a primary inspiration and mood-boarding tool for campaign concepting and visual direction.

Loomis — Pack-Out Cash Teller (2024–2025)

- Processed high-volume financial transactions with strict accuracy, attention to detail, and rigorous record keeping.
